Product Information

OVERVIEW

A light and elegant practical Power Bank that is just 12.5 mm thick despite its 5000 mAh high capacity, it is one of the most compact ever made, perfect to bring with you when you travel, connected to your Smartphone or other electronic device to extend the duration of the battery. The portable battery allows you to charge and sync your data with the convenient USB 2.0 port and the integrated and removable Micro USB cable. Smart technology always provides the device with the right amount of power up to 2.1A and automatically detects the type of device connected. You can simultaneously charge your device and those of your friends, up to a maximum shared power of 3.1A.
