Product Information

OVERVIEW

The high-quality aluminum body is wrapped in a stylish protective case made of genuine leather that combines the class and portability of the product in a perfect combination and a truly innovative solution.

The high acoustic quality, top of the class in its category, in spite of the very compact size of the Speaker, will leave you breathless: offers outstanding bass and an extremely detailed sound thanks to the 20 Watt Rms reals and advanced 3D Surround system.

The Speaker is equipped with a large built-in battery to provide up to 10 hours of music playing at a very high volume, able to be able to fill an entire room with the clarity of a really powerful sound. The BT Wireless 4.0 and Aux connection possibilities allow you to connect all your terminals, such as smartphones, tablets and PC.

The buttons for total control are positioned on top of the device where there is also the option to answer phone calls and video conferences in order to use the BT 4.0 Wireless Speaker with built-in microphone. There is also Micro USB universal input and 3.5 mm Aux jack with its cables included in the package, completing a top quality offer
