Battery life up to 12 hours listening

Product Information

OVERVIEW

The BT Speaker with a modern and minimalist design in vintage style is named and inspired in its shape to that of submarines. The full and crystal clear sound offers a truly enveloping experience, ideal for listening to music during travel thanks to its ultra-compact size. The speaker has a built-in battery that can provide up to 12 hours of music playback and BT, NFC and AUX connection for connecting all devices like Smartphones and Tablet PCs. Simple to use because of the elegant aluminum multifunction control knob, built-in microphone for calls and video conferencing and universal micro USB and 3.5 mm Aux inputs, with their respective cables included in the package, which complete a great product.
