Product Information

OVERVIEW

The design and sound quality in the natural materials. The acoustic property of the real wood and the particular shape design of Geneeo in-ear headphones deliver an exceptional sound quality. The warm and natural tones allow the sound to be transformed into deep bass and crystal clear mids and highs that turn on the concert in your ears. 3 sizes of comfortable ear sleeves (S/M/L) are included in the package that placed on the speaker provide perfect insulation from the outside world. The anti-tangle cord with white and black two-tone intertwined nylon fabric has a remote control in high-end aluminum with built-in microphone and three buttons connected to it, that let you adjust the volume, play music and answer or hang up the phone. A compact luxury "carbon look" pouch complete the offer, allowing you to protect your earphones and carry them with you everywhere.
