The device will charge from 0% to 50% in just 30 minutes

### Product Information

## OVERVIEW

This car battery charger with great constructive quality is made of aluminum and steel, and its shape is similar to that of a bullet. Stylish and compact, it is an accessory that gives a touch of class and blends in with the interior of your car thanks to a light that emits an elegant soft blue light when its switched on and signals that the charger is fully plugged in and that the device is charging.

Dual USB output and super-fast charging technology allows you to connect multiple devices to connect your Smartphone or Tablet with a total output of 3.4A.

It has fast charge technology and an intelligent circuit that protects against short circuiting, overheating, overcurrent and over charging because the charging stops automatically when the battery is fully charged.
